

TravelSnug™ rolling instructions

1. Fold the blanket width way

2. Fold the TravelSnug seat part into the flat part of the back section.

3. Roll the TravelSnug tightly and place on the blanket

4. Wrap the blanket tightly round the rolled TravelSnug

5. Place the rolled bundle on the carry strap as above.

6. Secure the clips and adjust strap lengths as required

7. Rolled ready to carry with the handy carry strap

I love My TravelSnug™ Size 1

Side loops

Place the TravelSnug™ on the train / aircraft seat. The side loops can be against the seat or at the front. Against the seat can help to bring the side support round more.

When the child is sitting on the TravelSnug™, the curved neck support should fit around their shoulders to support their neck.

Pass the train / aircraft seat lap belt through the loops on both sides

Bring the strap between the child's legs up and pass the seat lap strap through this too.

Ensure that the strap does not impede the release of the buckle.

As the seat lap strap is adjusted as required, the TravelSnug will cocoon the child aiding comfort and providing neck and head support if the child falls asleep.

When positioning the cosy matching fleece blanket ensure that quick release lap belt buckle is clearly visible and accessible.

I love My TravelSnug™ Size 2

Side loops

When the child is sitting on the TravelSnug™, the curved neck support should fit around their shoulders to support their neck.

Pass the train / aircraft seat lap belt through the loops on both sides

As the seat lap strap is adjusted as required, the TravelSnug will cocoon the child aiding comfort and providing neck and head support if the child falls asleep. When positioning the cosy matching fleece blanket ensure that quick release lap belt buckle is clearly visible and accessible.

I love My TravelSnug™ size 1 and 2 with harness slots

Side loops

Harness slots maybe single or double

Feed the shoulder straps through the TravelSnug shoulder slots.

Fit the harness as per the manufacturer's instructions. Place the TravelSnug™ on the train / aircraft seat. The side loops can be against the seat or at the front. Against the seat can help to bring the side support round more.

When the child is sitting on the TravelSnug™, the curved neck support should fit around their shoulders to support their neck.

Pass the train / aircraft seat lap belt through the loops on both sides and secure harness as per the manufacturer's instructions.

Bring the strap between the child's legs up and pass the seat lap strap through this too.

Ensure that the strap does not impede the release of the buckle.
